

## Environmental Code of Conduct Draft 1 2024

We all have a responsibility to protect the environment and consciously reduce the impact of the work we do.

We will work on three different scales:

Small Acts - everyday actions.

Collective Efforts - partnerships, networks and collaborations

Global Context - big pictures

to:

Refuse

Reimagine

Reduce

Reuse

Repair

Redistribute

Reengineer

Repurpose

Recycle

### **Value Resources**

Tread lightly. Choose materials with their afterlife in mind. Only heat the space we need. Consider the real costs of digital infrastructure. Remember that what we do now impacts others in the future.

### **Work with Others to Make a Difference**

We need each other. Be active, start a dialogue, embed environmental thinking in conversations, contracts, and collaborations on all scales.

### **Support Local**

Make the Market our first port of call, support local businesses and minimise transport.

### **No Default Positions**

Challenge habits, ask questions, nothing will change unless we do.

### **Knowledge is Power**

Do the work, be climate literate. Understand our impact, track the data and use the information to make real change.

### **Create an Environment for All**

Climate is global. Recognise the interconnectedness of environmental and social issues and build new coalitions to address shared challenges. Inclusive partnerships enhance collective efforts towards achieving sustainability goals.
